

LED Bulb VALUE PAR16 80 GU10 60° 6.9W 3000K

Ref. O096769

VALUE PAR16 80 GU10 60° 6.9W 3000K Cold White LED Bulb is the perfect alternative to the GU10 halogen bulb. It is a spot type bulb with a diameter of 51mm. The two pins are spaced 10mm apart. The lamp operates at 220V -240V and does not require a transformer. !By switching to LED, you will gain numerous advantages! You can save up to 90% on energy and maintenance costs due to its low energy consumption of 6.9W and a lifespan of 10,000 hours. Traditional halogen GU10 bulbs last only 2,000 hours. LED lighting does not produce heat and does not emit UV radiation. ✓ Kelvin: 3000K ✓ CRI: ≥80 ✓ Power: 6.9W ✓ Base: GU10 ✓ Beam angle: 60°
