

DALI LED Controller (DT8) 5 in 1 - 12-24V DC

Ref. DL-X

The constant voltage LED driver with DALI protocol is an advanced device designed for the efficient management of LED lighting. It adopts the standard DALI protocol, is compatible with the DT8 type, and offers five output modes. It allows for brightness adjustment, color temperature, and RGB. With soft dimming functions, quick visualization, and setup, this controller is widely used in hotel lighting and home control.

Product data

Certs	CE, ROHS
Dimensions (mm) LxWxH	130 x 49 x 27
Warranty	According to legal warranty: 3 years
Maximum intensity (A)	20
IP	IP20
Temperature range	-10~40°F
Control system	DALI
Nominal Voltage (V)	12-24V DC
Outdoor Use	No
