

PWM 5-24V 16A single-color signal booster / repeater

Ref. B1624

1-channel PWM signal repeater for LED strips and single-color luminaires of 5-24VDC and a maximum of 16A. High-speed power amplifier (20ns), easy to install and requires no maintenance or management. Extend the length of your dimmable LED installations with signal amplifiers using a single dimmer controller. The dimming signal will be extended linearly and without delays. The placement of signal repeaters is independent of the installation of as many power supplies as needed to power the entire set. 5-24VDC 16A 1 channel IP20
