

Manual PWM dimmer with adjustable frequency and regulation curve 12/24V 30A

Ref. B1620

Manual knob dimmer for monochrome LED strips, 12/24V bulbs, and general dimmable fixtures of 12/24V, with a 1-channel output. It allows for variation and frequency selection from 300Hz to 10KHz and selection of linear or logarithmic regulation curve. Depending on the selected frequency, the manual regulator will allow up to a maximum current step of 30A. To view the value table, please refer to the expanded description below. IN/OUT: 12/24V Max. 30A Monocolor 1 channel IP20
