

Flexible silicone sleeve 10x18mm to convert LED strip to neon (5meters)

Ref. BPERFLEX10X18

Flexible silicone profile cover opal 10x18mm that converts any LED strip with a width of 8 or 10mm into flexible neon. It is supplied in lengths of 5 meters. Inside, it contains a cord along its entire length to facilitate assembly. Designed for lateral bending, it allows the creation of letters, drawings, and shapes. If you wish to create outlines, you should choose the model BPERFLEX16X16. ** LED strip, caps or staples not included ** 10x18mm 5 meters for PCB 8/10mm IP65
