

Silicone Clip for Flexible Swimsuit

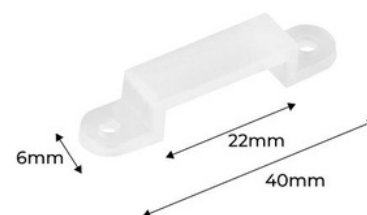

Ref. B1939-G

Silicone fixing clip for flexible swimwear models B1939-2770 [1] y B193-RGB [2] ideal for securely attaching the flexible swimsuit to any surface. It is easy to attach thanks to its flexible design made of silicone. It has holes for screws, which allows the light fixture to be kept flexible in place regardless of the passage of time or the type of installation. We recommend its use when performing a lighting installation that requires shaping the LED strips or fixtures, such as angles or installations where the LED strip or fixture needs to be held against a wall to achieve a specific lighting effect; the clips are durable and will do a great job providing stability to the LED installation.
