

300W Triac Dimmer - Leading/trailing edge dimming - On/off function

Ref. B708

The 300W Triac Dimmer is a light intensity regulator specifically designed for LED lighting. This device allows for smooth and precise control of light intensity from 0 to 100% by simply turning the circular knob. In addition, it features a switched toggle to turn the LED lighting on and off from two different points in the room, in combination with another switched toggle. Allows selection between leading edge cutoff control, supporting loads of up to 150W, and trailing edge control, supporting loads of up to 300W. ** The installation should be carried out by a qualified professional or consult our technical team for advice**
