

## Single Color Controller

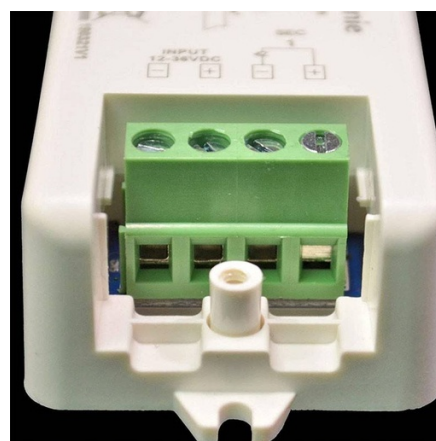

## Dimensions

## Dimmer DALI Mini 1 channel 8A DC 12-36V

### Ref. SR-2303S

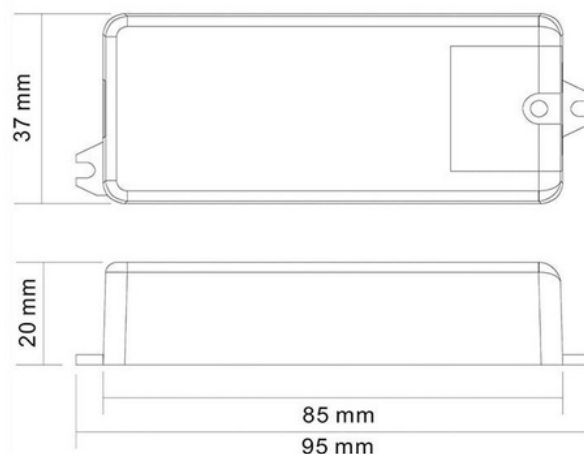

The SR-2303S is a constant voltage dimming LED controller. With a mini size, it has a 1 channel output of 8A. The DALI controller offers smooth dimming from 0%-100%, using logarithmic dimming. LED Dali regulator with 1 constant voltage channel and output of 8A per channel at an output of (12-36)V-DC. With a maximum output of 288W. Power repeater to expand the output indefinitely. Innovative function for adjusting minimum brightness and regulating up to 100% brightness. Ideal for dimming and changing single-color LED lamps, traditional incandescent and halogen lights.
