

CCT touch dimmer mechanism for 4 zone LED lighting - SUNRICHER - DALI

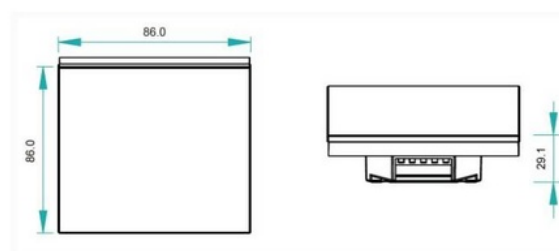

Ref. SR-2300TS-CCT-EU

The SR-2300TS-DIM-CCT is a CCT touch switch that allows you to select the brightness and color of our LED lights. It features DALI output for dimming and switching 4 light zones. The touch panel, designed with high-strength tempered glass, provides smooth regulation and switching functions without flickering. The LED dimmer is easy to install, with an installation manual in the box and compatible with various DALI products of 12-24V-DC. You can control up to 4 zones with 2 customizable scenes to save and play in each zone. Control a variety of LED lights.
