

Square cardan type downlight ring for QR111 or AR111 bulb - Cutting 155 x 155 mm

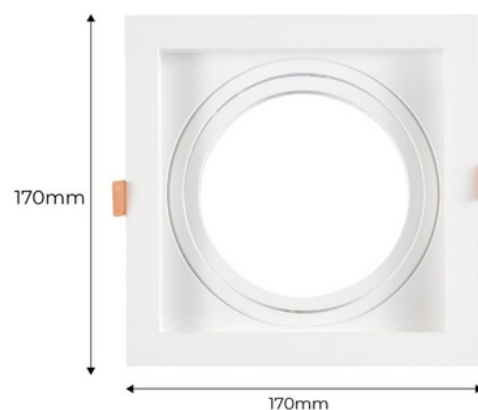

Cardan type tilting arm made of polycarbonate for a QR111 or AR111 LED bulb. It features a tilting structure that allows the luminaire to be oriented towards the desired point. It also includes an accessory that allows two rings to be nested together. Additional rings can then be added to form larger structures, according to the needs of each project. Due to its characteristics, it is an ideal product for use in commercial installations such as clothing stores, food stores, accessories, etc., although it can also be used in domestic installations. Available in black and white. Includes screws and a metal accessory to connect two rings. ** Does not include LED bulb **
