

RGB connection cable for Flexible Swimsuit B1939-RGB

Ref. B1939-C-RGB

4-pin starter cable with a total length of 160mm, covered in white PVC plastic. It is necessary for connecting LED strips, floodlights, or other compatible products; directly to the male Jack connector of a power supply or for connecting multiple strips or floodlights together. This connector facilitates the connection between the flexible swimsuit B1939-RGB [1] and a compatible 24V power supply and the RGB controller, making installation more practical. Article Features: ✓ Waterproof connector start cable of 4 ✓ Connection method: The male and female ends push or press inward (Quick coupling system) ✓ Material (outer): PVC plastic ✓ Total length (connection): 160 mm ✓ Coupling type: Female [1] <https://www.barcelonaed.com/iluminacion-led-arquitectonica/banador-de-pared-led/banador-flexible-24v-20wm-rgb-42chipm-ip67-angulo1545-cri80.html>
