

Watertight T-connection cable for 6 RGB beacons

Ref. BA50063

Sealed connection cable to install up to 6 LED RGB spots/markers. This connector makes it easier to position outdoor lights when several are placed together. The cable has a length of 3 meters, and each T connection is separated from the others by about 50 cm. To complete the installation, we also need the RGB spots, an RGB controller, the power supply, and the remote control.

Product data

Certs	CE, ROHS
Dimensions (mm) LxWxH	3000
Warranty	According to legal warranty: 3 years
Nominal Voltage (V)	12V DC
